

With many thanks to Morris Penguilly for his generous donation, we now have a Hearing Assist System in place at Mantua Center Christian Church. If hearing the church service has become a challenge for you, we have two ways to get a boost in the sound:

- **FM receivers** - 2 FM sets of FM receivers and headphones are available on a first come first serve basis
 - no setup is required by the user
- **WiFi** - Guests can use their own smartphone with their earbuds/phones/hearing aids
 - 1) Guests must download & install the **WaveCAST Audio Receiver** app (by WilliamsSound, LLC) on their device (see below for iOS).
 - 2) Guests must connect to the **WiFi** called *MCCCHearingAssist* with the password: *ihearMCCC*
 - 3) Guests must open the WaveCAST app and click on the line item **MCCCHearingAssist**

We hope that you take advantage of this new technology! Please see Carol Magyarics if you need help getting setup or have any questions.
